## Additional rental equipment information

Certain jobs including but not limited to drywall compound sanding, wood sanding, cement/other-powder mixing, concrete/rock demolition, sand-blasting, painting, chemical/organic odor removal may result in heavy production of dust or particles and require a HEPA filter replacement. For these types of jobs, customer is obligated to replace primary filters and/or carbon filters as much as needed in order to keep the Air scrubber/Negative air Machines clean and avoid clogging the HEPA filter. Other machines such as Ozone Generators and Dehumidifiers may not be used during demolition or during other jobs in which production of dust particles may occur. All rented equipment/machines must be returned in pre-condition, wiped clean & and vacuumed free of dust/debris inside and out, otherwise a HEPA filter replacement and servicing charge may apply. For jobs where a HEPA filter replacement is required a servicing charge of \$195/per rented machine will apply in addition to regular Rental Agreement rates.

## Please read the following carefully:

- 1. Customer agrees to return all rented equipment/machines in its pre-condition, wiped clean & and vacuumed free of dust/debris inside and out.
- 2. Customer agrees to use all primary filters (Stage one/two filters) initially purchased and contact office immediately should additional filters be needed, there are no returns of primary filters.
- Customer agrees to provide own extension cord(s) for the equipment rented (unless specifically requested and indicated in blank spaces provided on Equipment Rental Agreement)
- 4. Customer agrees to verify with the Technician upon delivery the jobsite where the machines rented are to be used.
- 5. All filters that come with rented machines must be used and primary filters have to be replaced periodically while machines on site in any state.

  Filters cannot be returned and no refunds are available for filters!
- 6. Alpine Air Corp is not responsible for setup or moving machines on site. Renter must have knowledge of how to operate and monitor rented equipment.
- 7. Renter is responsible for safety of jobsite and machines. Alpine Air Corp is not responsible if property damage occurs while running, transporting or during setup of machines on site. Renter acknowledges that Alpine Air Corp. is only providing curbside delivery and does not perform any work.
- 8. By signing below, customer agrees to pay all agreed upon fees associated with the above stated addendum to rental agreement, and agrees to abide by all of the above statements.

ease feel free to contact the office if you have any questions. Thank
